Professional Summary

Full-stack developer with experience building and deploying scalable applications (~3000 users). Skilled in JavaScript, React, Node.js, and MongoDB. Passionate about solving complex problems and contributing to high-impact projects in fast-paced environments.

Technical Skills

- **Languages & Frameworks:** JavaScript, HTML, CSS, React.js, Node.js, Express.js
- **Databases:** MongoDB, Firestore
- **Tools & Technologies:** Firebase, Git, REST APIs, Cloudinary.
- **Other Skills:** Problem-solving, Critical thinking, Logical thinking, Adaptability, Time management.

Education

BCA in **Artificial Intelligence**, Majlis Arts and Science College, Calicut University (2024-2028)

Projects

Movie Review and Rating App

<https://movie-review-minhaj.web.app/>

- Developed a comprehensive , responsive movie review and rating application using **React.js (3x** reuse of components), **Node.js**, and **MongoDB (60%** faster results due to optimized queries)
- Implemented features including user **authentication**, movie **search** (used MongoDB, **35%** fast results), review submissions, and ratings.
- Facilitated an admin page (**95%** complete CRED access on data)with complete access over user's data.

COLLEGE PROJECT (~3000 users)

<https://iedc-web-phi.vercel.app/>

- **Independently** built a scalable **full-stack web platform** aimed to serve **3000+ users**.
- Implemented image upload functionality using **Cloudinary**.
- Used **MongoDB** for database management (resulted **30%** uptime on data fetching), **Express.js** as the backend, and **Next.js** for frontend (resulted in **40%** success on seo)
- Developed a robust **admin panel** for managing user-side data (**95%** CRED access).

Hobby projects:

- TIC-TAC-TOE II NEXT.JS (vs Human/vs AI) <https://tic-tac-toe-coral-five-65.vercel.app>
- Funny valentines special web page II Vanilla JS <https://valentines-proposes.web.app/>

EXPERIENCE

Web Development Course

Entri app (2023 Aug- 2024 June)

- Completed **200+ hrs** of training HTML, CSS, JavaScript, and responsive design.
- Developed several projects including a personal portfolio website and a dynamic to-do list application.
- Gained familiarity with **React.js, Git, Node.js, Express.js, MongoDB, and Firebase**.
